# Grade 4 Math – Mid-Term Revision Sheet

Math · Knowledge City Schools · Answer key ✅

## I. Place value & number forms

💡 Place = WHERE the digit sits (ones, tens, hundreds…). Value = how much it is worth (digit × place). Empty places get a 0! 🔢

**1. The place value of the digit 8 in the number 5,621,834 is …**

A tens
**B hundreds ✓**
C thousands
D hundred thousand

**Why:** Start counting from the RIGHT: 4 is ones, 3 is tens, 8 is hundreds. So the 8 is in the hundreds place.

🔢 ابدأ العدّ من اليمين: آحاد، عشرات، مئات.

**2. The place value of the digit 1 in the number 5,162,834 is …**

A tens
B hundreds
C thousands
**D hundred thousand ✓**

**Why:** Count from the right: 4 ones, 3 tens, 8 hundreds, 2 thousands, 6 ten thousands, 1 hundred thousand.

🔢 الرقم 1 في خانة مئات الألوف.

**3. What is the place value of the 3 in 73,429?**

A Hundred Thousands
B Ten Thousands
**C Thousands ✓**
D Hundreds

**Why:** 73,429 → 9 ones, 2 tens, 4 hundreds, 3 thousands. The 3 is in the thousands place.

🔢 الرقم 3 في خانة الألوف.

**4. What is the value of the 9 in 4,923,547?**

A 9
B 90,000
**C 900,000 ✓**
D 9,000,000

**Why:** Place value tells WHERE the digit is. Value tells HOW MUCH it is worth. The 9 is in the hundred thousands place, so it is worth 9 × 100,000 = 900,000.

💡 القيمة = الرقم × خانته.

**5. What is the value of 7 in the number 638,972?**

A 7
**B 70 ✓**
C 700
D 7000

**Why:** The 7 is in the tens place (second from the right), so it is worth 7 × 10 = 70.

💡 الرقم 7 في خانة العشرات = 70.

**6.** **The number 8,200,407 in expanded form = ...**

A 80,000,000 + 2,000,000 + 400 + 70

B 8,000,000 + 2,000 + 400 + 7

**C 8,000,000 + 200,000 + 400 + 7 ✓**

D 8,000,000 + 200,000 + 400 + 70

**Why:** Read each digit with its place: 8 millions + 2 hundred thousands + 4 hundreds + 7 ones. The zeros are skipped.

✏️ الصيغة الموسعة = نكتب قيمة كل رقم ونجمعها.

**7.** **6 million + 2 hundred thousand + 5 ten thousands + 9 hundred =**

**A 6,250,900 ✓**

B 6259

C 625,900

D 620,050,900

**Why:** Put each part in its place: 6,000,000 + 200,000 + 50,000 + 900 = 6,250,900.

💡 اكتب كل جزء في خانته ثم اجمع.

**8.** **300,000 + 50,000 + 9,000 + 70 + 1 =**

A 350,971

B 35971

**C 359,071 ✓**

D 359,710

**Why:** Write the digits in their places: 3 (hundred thousands) 5 (ten thousands) 9 (thousands) 0 (hundreds — there is none!) 7 (tens) 1 (ones) → 359,071.

⚠️ لا تنسَ الصفر في الخانة الفارغة.

**9.** **One million, two hundred seventy thousand, six hundred thirty-three =**

A 1,276,330

**B 1,270,633 ✓**

C 127,633

D 1,027,633

**Why:** Say it in three groups: one million | two hundred seventy thousand | six hundred thirty-three → 1 , 270 , 633.

💡 كل مجموعة بين الفواصل = 3 أرقام.

**10.** **Eighty million, four hundred twenty-four thousand, nineteen =**

A 80,424,090

B 84,219

C 8,042,419

**D 80,424,019 ✓**

**Why:** Three groups: eighty million | four hundred twenty-four thousand | nineteen → 80 , 424 , 019. Nineteen needs a zero in front to fill 3 digits.

⚠️ نكتب 019 وليس 19 لأن كل مجموعة 3 أرقام.

**11.** **The number 6,100,907 in expanded form = ...**

A 60,000,000 + 1,000,000 + 900 + 70

B 6,000,000 + 1,000 + 900 + 7

**C 6,000,000 + 100,000 + 900 + 7 ✓**

D 6,000,000 + 100,000 + 900 + 70

**Why:** 6 millions + 1 hundred thousand + 9 hundreds + 7 ones = 6,000,000 + 100,000 + 900 + 7.

✏️ الصيغة الموسعة.

**12. The standard form of 6,000,000 + 20,000 + 300 + 70 + 8 is ...**

A 60,002,378
B 62,378
C 602,378
**D 6,020,378 ✓**

**Why:** Put the parts in their places: 6 , 0 2 0 , 3 7 8. There are NO hundred thousands and NO thousands, so write 0 there → 6,020,378.

⚠️ الخانات الفارغة = صفر.

**13. The standard form of 60,000,000 + 2,000 + 300 + 70 + 8 is ...**

**A 60,002,378 ✓**
B 62,378
C 602,378
D 6,020,378

**Why:** 60,000,000 is sixty million. Then 2,000 is in the thousands place → 60 , 002 , 378.

⚠️ ضع أصفارًا للخانات الفارغة.

**14. The value of the digit 8 in the number 9,080,134 is ...**

A 80
B 8000
**C 80,000 ✓**
D 8

**Why:** 9,080,134 → the 8 is in the ten thousands place, so it is worth 8 × 10,000 = 80,000.

💡 القيمة = الرقم × خانته.

**15. The value of the digit 9 in the number 9,080,134 is ...**

A 90
**B 9,000,000 ✓**
C 90,000
D 9

**Why:** The 9 is the first digit of a 7-digit number, so it is in the millions place: 9,000,000.

💡 أول رقم في عدد من 7 خانات = ملايين.

**16. 506,000 = ..... thousands**

**A 506 ✓**
B 5,060
C 50,600
D 6

**Why:** How many thousands are in 506,000? Take away the three zeros: 506,000 = 506 thousands.

💡 احذف 3 أصفار لتعرف عدد الألوف.

**17. 26,000 = ..... hundreds**

A 26
**B 260 ✓**
C 2,600
D 26,000

**Why:** How many hundreds are in 26,000? Take away two zeros: 26,000 = 260 hundreds.

💡 احذف صفرين لتعرف عدد المئات.

## I. Compare, round, add & subtract

💡 Compare from the LEFT, one digit at a time. Rounding: look at the digit to the right — 5 or more go UP, 4 or less go DOWN. 🎯

**18.** 746,239 ..... 749,052

A < ✓ B >

C = D none of them

**Why:** Both start with 74. Next digit: 6 is smaller than 9, so 746,239 is SMALLER → <.

🔍 قارن رقمًا رقمًا من اليسار.

**19.** 156,239 ..... 149,052

A < B > ✓

C = D none of them

**Why:** Both start with 1. Next digit: 5 is bigger than 4, so 156,239 is BIGGER → >.

🔍 قارن من اليسار.

**20.** What is 749,012 rounded to the nearest 100,000?

A 750,000 B 800,000

C **700,000** ✓ D 749,012

**Why:** Round to the nearest 100,000: look at the digit after the hundred thousands → 749,012, the 4 is less than 5, so round DOWN to 700,000.

🎯 أقل من 5 = ننزل.

**21.** What is 749,012 rounded to the nearest million?

A 749,012 B **1,000,000** ✓

C 700,000 D 0

**Why:** Round to the nearest million: 749,012 is closer to 1,000,000 than to 0 (the 7 is 5 or more, so round UP).

🎯 5 فأكثر = نرفع.

**22.** What is 129,057 rounded to the nearest ten thousand?

A 120,000 B **130,000** ✓

C 129,000 D 129,060

**Why:** Nearest ten thousand: 129,057 → look at the thousands digit (9). It is 5 or more, so round UP: 130,000.

🎯 5 فأكثر = نرفع.

**23.** What is 749,012 rounded to the nearest 10,000?

A **750,000** ✓ B 800,000

C 700,000 D 749,012

**Why:** Nearest 10,000: 749,012 → the thousands digit is 9, so round UP: 750,000.

🎯 5 فأكثر = نرفع.

**24.** 82,124 – 99 =

A **82,025** ✓ B 82,000

C 72,124 D 99

**Why:** Trick: take away 100 (82,024), then give back 1 → 82,025.

✨ اطرح 100 ثم أضف 1.

**25.** **99,124 − 99 =**

A 98,025 B 124

C 98,124 **D 99,025 ✓**

**Why:** Take away 100 → 99,024, then give back 1 → 99,025.

✨ اطرح 100 ثم أضف 1.

**26.** **The sum of 8,024 + 999 =**

A 8,024,999 B 8,923

**C 9,023 ✓** D 9,024

**Why:** Trick: add 1,000 (9,024), then take away 1 → 9,023.

✨ أضف 1000 ثم اطرح 1.

**27.** **The sum of 6,024 + 999 =**

A 6,024,999 B 6,923

**C 7,023 ✓** D 7,024

**Why:** Add 1,000 → 7,024, then take away 1 → 7,023.

✨ أضف 1000 ثم اطرح 1.

**28.** **Estimate the difference 948 − 297 to the nearest hundred =**

A 680 B 700

C 800 **D 600 ✓**

**Why:** Round first, then subtract: 948 → 900 and 297 → 300. 900 − 300 = 600.

🎯 قرّب أولًا ثم اطرح.

**29.** **Estimate the difference 978 − 297 to the nearest hundred =**

A 680 **B 700 ✓**

C 800 D 600

**Why:** 978 → 1,000 and 297 → 300. 1,000 − 300 = 700.

🎯 قرّب أولًا ثم اطرح.

**30.** **Estimate the sum 998 + 297 to the nearest ten =**

**A 1,300 ✓** B 900

C 1,000 D 300

**Why:** 998 → 1,000 and 297 → 300. 1,000 + 300 = 1,300.

🎯 قرّب أولًا ثم اجمع.

## I. Factors, primes & patterns

💡 Prime = only 2 factors (1 and itself). Composite = more than 2. Pattern = a rule that repeats. 🔑

**31. Which list contains all prime numbers?**

A 1, 2, 3, 5
B 2, 5, 13, 39
**C 2, 3, 5, 7 ✓**
D 2, 5, 13, 66

**Why:** A prime number has only 2 factors: 1 and itself. 1 is NOT prime. 39 = 3 × 13 and 66 = 2 × 33 are not prime. Only 2, 3, 5, 7 are all prime.

🔑 العدد الأولي يقبل القسمة على 1 ونفسه فقط.

**32. Which factor of 24 is missing? 1, 2, 3, 4, 6, ....., 12, 24**

A 7
**B 8 ✓**
C 9
D 10

**Why:** Factors of 24 are the numbers that divide 24 exactly: 1, 2, 3, 4, 6, 8, 12, 24. 8 × 3 = 24 ✓.

🔑 العامل يقسم العدد بدون باقٍ.

**33. Which multiple of 6 is missing? 6, 12, ....., 24, 30**

A 4
B 16
C 14
**D 18 ✓**

**Why:** Multiples of 6 = count by sixes: 6, 12, 18, 24, 30.

🔑 المضاعفات = جدول الضرب.

**34. A ..... is a number that has more than two factors.**

**A composite number ✓**
B prime number
C pattern
D multiple

**Why:** Composite = more than two factors (like 6: 1, 2, 3, 6).

🔑 مركّب = له أكثر من عاملين.

**35. A ..... is a number that has two factors only: 1 and itself.**

A composite number
**B prime number ✓**
C pattern
D multiple

**Why:** Prime = exactly two factors: 1 and itself (like 7).

🔑 أولي = عاملان فقط.

**36. A ..... is a list of figures, symbols, or numbers that follow a certain rule.**

A composite number
B prime number
**C pattern ✓**
D multiple

**Why:** A pattern is a list that follows a rule.

🔑 النمط = قائمة تتبع قاعدة.

**37. Each number in a numerical pattern is a .....**

**A term ✓**
B sequence
C pattern
D multiple

**Why:** Each item in a pattern is called a term.

🔑 كل عنصر في النمط = حد.

**38.** A ..... is the ordered arrangement of the terms that make a pattern.

A term
**B sequence ✓**
C pattern
D multiple

**Why:** A sequence is the terms arranged in order.

🔑 المتتابعة = الحدود مرتبة.

**39.** The next figure in the pattern: ▽ □ ○ ▽ □ ○ ▽ .....

A ○ circle
**B □ square ✓**
C △ triangle
D ▷ triangle

**Why:** The rule repeats: ▽ □ ○, ▽ □ ○, ▽ ... so after ▽ comes □.

🔁 ابحث عن المجموعة التي تتكرر.

**40.** The next figure in the pattern: □ □ △ □ □ .....

A ○ circle
B □ square
**C △ triangle ✓**
D ▷ triangle

**Why:** The rule repeats: □ □ △, □ □ ... so the next one is △.

🔁 المجموعة المكررة: مربع مربع مثلث.

**41.** The next figure in the pattern: △ ○ □ △ ○ □ △ .....

**A ○ circle ✓**
B □ square
C △ triangle
D ▭ rectangle

**Why:** The rule repeats: △ ○ □, △ ○ □, △ ... so after △ comes ○.

🔁 المجموعة المكررة: مثلث دائرة مربع.

## II. Compare with >, < or =

💡 First count the digits — more digits = bigger. Same digits? Compare from the left. The open mouth > eats the bigger number! 🐊

**42.** 993,249 ..... 1,003,225

**A < ✓**
B >
C =

**Why:** Count the digits: 993,249 has 6 digits, 1,003,225 has 7 digits. More digits = bigger number. So <.

🔍 عدد الخانات أولًا.

**43.** 562,501 ..... 526,105

A <
**B > ✓**
C =

**Why:** Both start with 5. Next digit: 6 > 2, so 562,501 is bigger → >.

🔍 قارن من اليسار.

**44.** **671 thousand ..... 671,000**

A <  B >

C = ✓

**Why:** 671 thousand means 671,000. They are the same → =.

💡 671 ألفًا = 671,000.

**45.** **753,249 ..... 1,753,249**

A < ✓  B >

C =

**Why:** 753,249 has 6 digits, 1,753,249 has 7 digits → <.

🔍 عدد الخانات أولًا.

**46.** **562,501 ..... 256,105**

A <  B > ✓

C =

**Why:** First digit: 5 > 2, so 562,501 is bigger → >.

🔍 قارن أول رقم.

**47.** **518 hundred ..... 518,000**

A < ✓  B >

C =

**Why:** 518 hundred = 518 × 100 = 51,800. That is smaller than 518,000 → <.

💡 518 مئة = 51,800.

**48.** **3 million, 18 thousand ..... 2 million, 999 thousand, 514**

A <  B > ✓

C =

**Why:** 3 million is more than 2 million, so 3,018,000 > 2,999,514.

💡 3 ملايين أكبر من 2 مليون مهما كان الباقي.

**49.** **1,572,430 ..... 157,243**

A <  B > ✓

C =

**Why:** 1,572,430 has 7 digits, 157,243 has 6 → >.

🔍 عدد الخانات أولًا.

**50.** **4,390,208 ..... 4,390,028**

A <  B > ✓

C =

**Why:** Same until the hundreds: 2 > 0, so 4,390,208 is bigger → >.

🔍 قارن رقمًا رقمًا.

**51.** 529,321 ..... 946,521

**A** < ✓ **B** >

**C** =

**Why:** First digit: 5 < 9 → <.

🔍 قارن أول رقم.

**52.** 274,539 ..... 274,509

**A** < **B** > ✓

**C** =

**Why:** Same until the tens: 3 > 0 → >.

🔍 قارن رقمًا رقمًا.

**53.** 8,534,251 ..... 8,257,314

**A** < **B** > ✓

**C** =

**Why:** Second digit: 5 > 2 → >.

🔍 قارن من اليسار.

**54.** 370 tens ..... 37 thousands

**A** < ✓ **B** >

**C** =

**Why:** 370 tens = 3,700. 37 thousands = 37,000. So <.

💡 370 عشرة = 3,700.

## III & IV. Add and subtract

💡 Write the numbers under each other, start from the ones, carry or borrow when you need to. ➕➖

**55.** 56,349 + 32,065 =

**A** 88,304 **B** **88,414** ✓

**C** 88,404 **D** 89,414

**Why:** Line up the digits and add from the right: 9+5=14 (write 4, carry 1), 4+6+1=11 (write 1, carry 1), 3+0+1=4, 6+2=8, 5+3=8 → 88,414.

➕ ابدأ من الآحاد واحمل الزيادة.

**56.** 708,324 + 351,742 =

**A** 1,060,166 **B** **1,060,066** ✓

**C** 959,066 **D** 1,059,066

**Why:** Add from the right: 4+2=6, 2+4=6, 3+7=10 (write 0, carry 1), 8+1+1=10 (write 0, carry 1), 0+5+1=6, 7+3=10 → 1,060,066.

➕ احمل الزيادة للخانة التالية.

**57.** **1,708,324 + 351,742 =**

A 2,059,066
B 2,160,066
**C 2,060,066 ✓**
D 1,060,066

**Why:** Same as the one before, but with 1 million extra: 1,060,066 + 1,000,000 = 2,060,066. ➕

**58.** **48,249 − 22,066 =**

A 26,283
B 25,183
C 26,173
**D 26,183 ✓**

**Why:** Subtract from the right: 9−6=3; 4−6 can't, so borrow: 14−6=8; then 1−0=1, 8−2=6, 4−2=2 → 26,183.

➖ استلف من الخانة التي على اليسار.

**59.** **879,775 − 371,641 =**

A 507,134
B 508,234
C 508,144
**D 508,134 ✓**

**Why:** Subtract column by column: 5−1=4, 7−4=3, 7−6=1, 9−1=8, 7−7=0, 8−3=5 → 508,134.

➖ لا حاجة للاستلاف هنا.

**60.** **830,569 − 37,062 =**

**A 793,507 ✓**
B 793,407
C 803,507
D 793,517

**Why:** Subtract from the right: 9−2=7, 6−6=0, 5−0=5. Then 0−7 can't → borrow (the 3 becomes 2): 10−7=3. Then 2−3 can't → borrow again (the 8 becomes 7): 12−3=9. Last: 7−0=7 → 793,507.

➖ استلف من الخانة التي على اليسار كلما احتجت.

## V. Order numbers

💡 Least to greatest = small → big. Greatest to least = big → small. Count digits first! 📶

**61.** **Order from LEAST to greatest: 3,804,127 · 308,412 · 3,048,159 · 3,408,159**

A 3,804,127 · 3,408,159 · 3,048,159 · 308,412
**B 308,412 · 3,048,159 · 3,408,159 · 3,804,127 ✓**
C 3,048,159 · 308,412 · 3,408,159 · 3,804,127
D 308,412 · 3,408,159 · 3,048,159 · 3,804,127

**Why:** Least to greatest = smallest first. 308,412 has only 6 digits, so it is the smallest. Then compare the 7-digit numbers by their second digit: 0, 4, 8.

📶 الأقل خانات هو الأصغر.

**62. Order from LEAST to greatest: 804,007 · 3,000,090 · 3,000,009 · 308,700**

A 3,000,009 · 3,000,090 · 308,700 · 804,007

**B 308,700 · 804,007 · 3,000,009 · 3,000,090 ✓**

C 804,007 · 308,700 · 3,000,009 · 3,000,090

D 308,700 · 804,007 · 3,000,090 · 3,000,009

**Why:** 6-digit numbers first: 308,700 then 804,007. Then 3,000,009 and 3,000,090: look at the tens: 0 < 9.

📶 رتّب من الأصغر.

**63. Order from GREATEST to least: 577,859 · 567,895 · 577,589 · 1,567,985**

A 1,567,985 · 577,589 · 577,859 · 567,895

B 1,567,985 · 567,895 · 577,859 · 577,589

C 577,859 · 1,567,985 · 577,589 · 567,895

**D 1,567,985 · 577,859 · 577,589 · 567,895 ✓**

**Why:** Greatest first: 1,567,985 has 7 digits. Then 577,859 vs 577,589: hundreds 8 > 5. Last is 567,895.

📶 رتّب من الأكبر.

**64. Order from GREATEST to least: 5,084,127 · 508,412 · 5,840,159 · 5,408,159**

A 508,412 · 5,084,127 · 5,408,159 · 5,840,159

B 5,408,159 · 5,840,159 · 5,084,127 · 508,412

C 5,840,159 · 5,084,127 · 5,408,159 · 508,412

**D 5,840,159 · 5,408,159 · 5,084,127 · 508,412 ✓**

**Why:** Greatest first: compare the second digit of the 7-digit numbers: 8 > 4 > 0. The 6-digit number 508,412 is last.

📶 رتّب من الأكبر.

## VI. Problem solving

💡 'In all', 'altogether', 'has now' → add. 'How many more', 'left', 'difference' → subtract. 🧠

**65. Aaron's telephone number is 7345981. Write it in word form.**

**A seven million, three hundred forty-five thousand, nine hundred eighty-one ✓**

B seventy-three million, forty-five thousand, nine hundred eighty-one

C seven hundred thirty-four thousand, five hundred ninety-eight

D seven million, three hundred forty-five, nine hundred eighty-one

**Why:** Split into groups of three from the right: 7 | 345 | 981 → seven million, three hundred forty-five thousand, nine hundred eighty-one.

🗣️ قسّم إلى مجموعات من 3 أرقام.

**66.** **Adam drove 38,497 miles this year and 21,503 miles last year. How many miles did Adam drive in all?**

- **A** **60,000** ✓
- **B** 59,000
- **C** 16,994
- **D** 60,100

**Why:** 'In all' means add: 38,497 + 21,503 = 60,000.

➕ «في المجموع» = جمع.

**67.** **Walid drove 789 miles one day and 246 miles the day after. How many MORE miles did Walid drive on the first day?**

- **A** 1,035
- **B** **543** ✓
- **C** 453
- **D** 553

**Why:** 'How many more' means subtract: 789 – 246 = 543.

➖ «كم أكثر» = طرح.

**68.** **Leo had 2,164 stamps. His friend Casey gave him 3,754 stamps. How many stamps does Leo have now?**

- **A** **5,918** ✓
- **B** 1,590
- **C** 5,818
- **D** 5,928

**Why:** Leo got MORE stamps, so add: 2,164 + 3,754 = 5,918.

➕ «أعطاه» = جمع.
